BWC Program

Building Women's Careers Program (BWC)

- Australian Government initiative delivered through the Department of Employment and Workplace Relations under the Future Made in Australia agenda
- Designed to drive structural and cultural change across four industries: construction, clean energy, advanced manufacturing, digital & technology
- Focused on expanding women's access to flexible, safe and inclusive training and employment

Building Women's Careers

An Australian Government Initiative

...ers preventing women
...nd progressing in these sectors

Strategic Programs

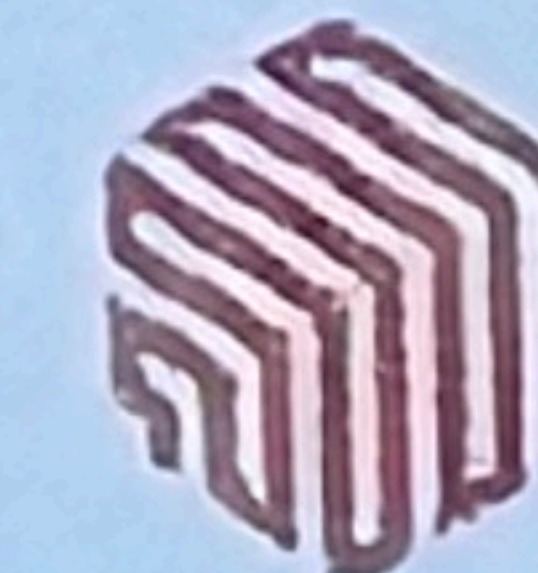

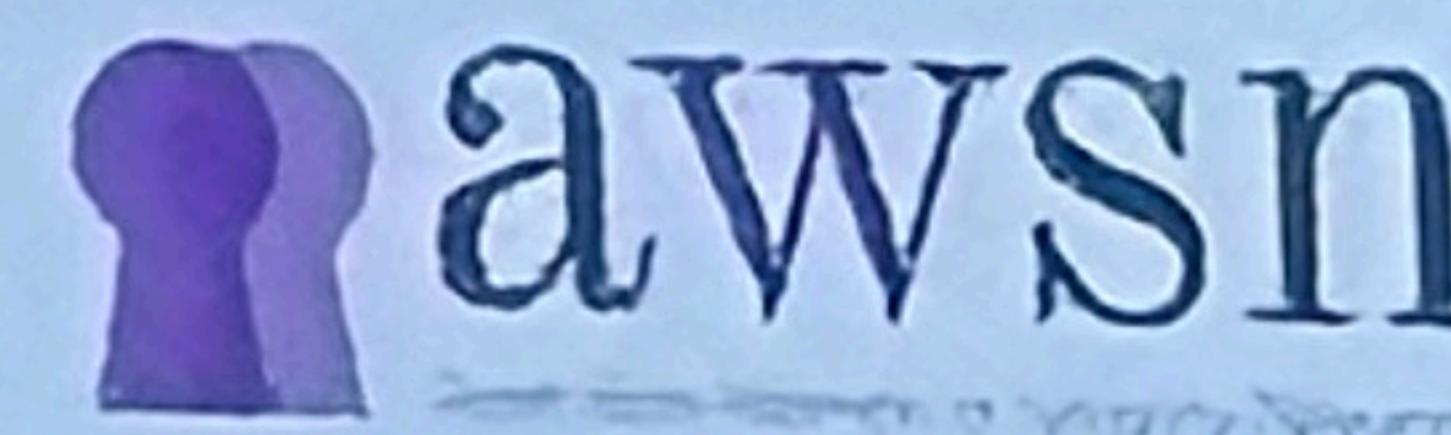

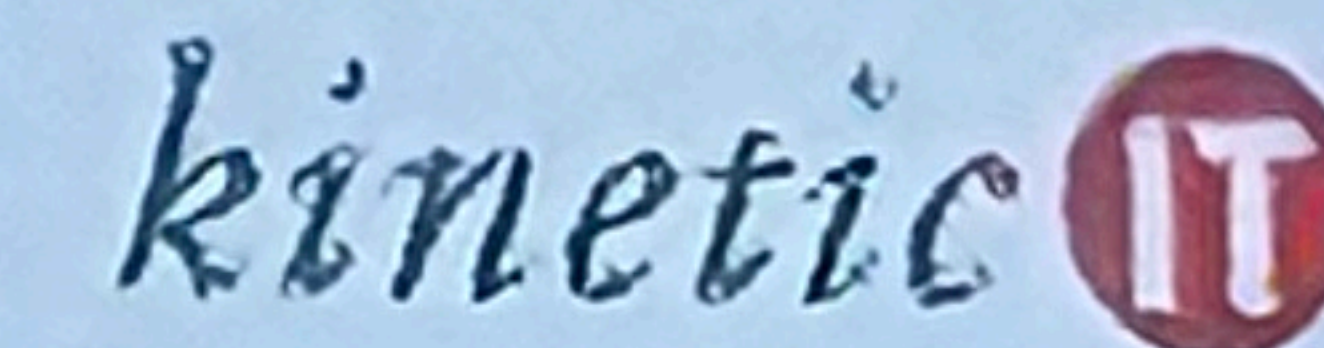

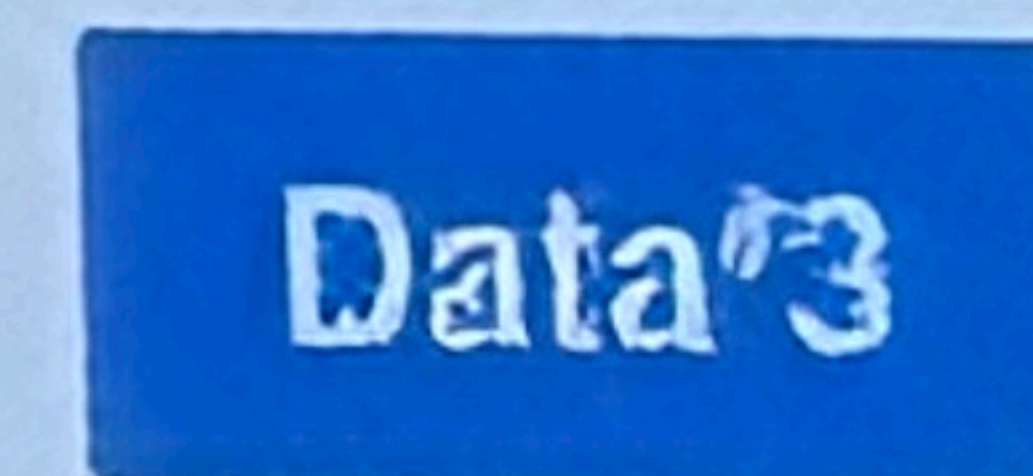

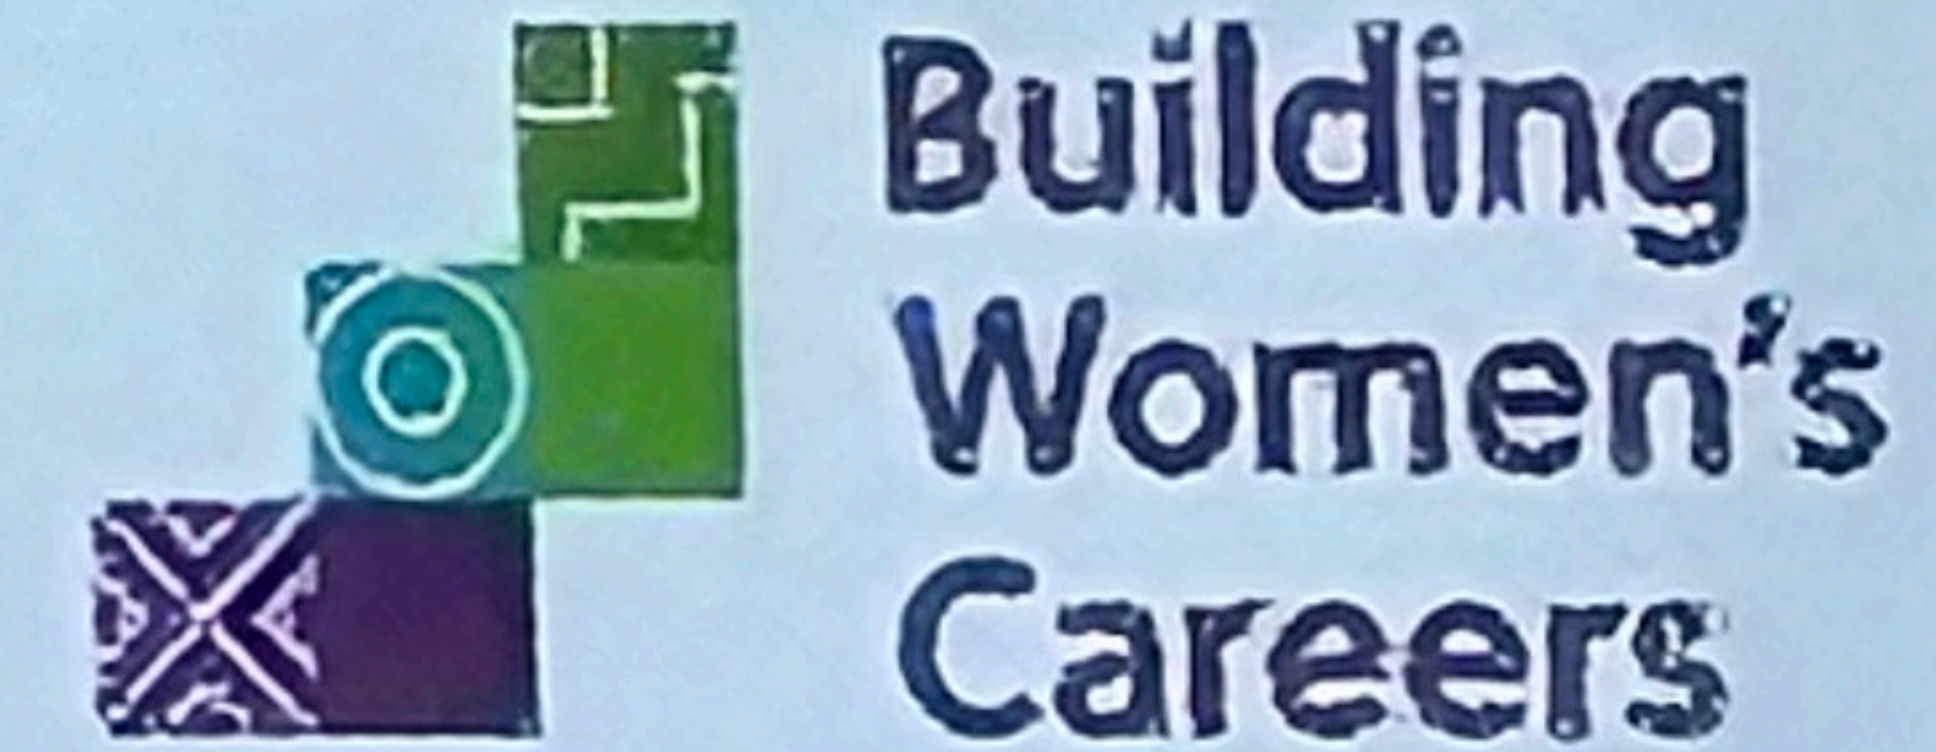

WITWA CyberThrive
TECH (+)

The CyberThrive project is a collaboration with VET and industry with the aim to reduce barriers for women entering cybersecurity, especially career changers, women returning-to-work and executive leadership through:

- Structured career pathways
- Industry mentoring
- Employer engagement
- Sustainable career placement

This program positions WITWA not just as an advocacy organisation, but as a workforce development partner contributing directly to WA's digital economy.
